Ways to check Duo Authentication for Windows Login

Windows Logon version 3.0.0.85 and newer version supports TLS 1.2 on all Windows operating systems that support TLS 1.2.

So, please check if your Windows OS is a supported version first.
Also, please check if the version of Duo Authentication for Window Logon is supported.

1. **To check the version of Duo Authentication for Windows Logon**

   - Select **Start**, type **Control Panel**.

   - Under Programs and Features, find **Duo Authentication for Windows Login** and check if it is **version 3.0.0.85 or above**.

     If not, you are recommended to upgrade it to the supported version. You can download the latest "Duo Authentication for Windows Logon Installer Package" at https://dl.duosecurity.com/duo-win-login-latest.exe.
