# Step-by-step procedures for setting, opening, and removing a password on MS Office 2010 documents

Information Security Section, Information Technology Service Centre

April 2012

This guideline contains step-by-step procedures for (i) setting a password for some common Microsoft Office 2010 (e.g. Microsoft Word 2010, Microsoft Excel 2010, and Microsoft PowerPoint 2010) documents, in order to protect them from unauthorized access; (ii) opening a password-protected document; and (iii) removing the password of a password-protected document.

In this guideline, we will show you the steps with an example of a Microsoft Word 2010 document named "**Confidential Information.doc**" under "**C:\My Documents\**".

Note: You may apply the steps to any existing Microsoft Office 2010 document in your computer.

## A. To set a password for a Microsoft Office 2010 document

This part will show you how to set a password for the Microsoft Office 2010 documents. Same steps can be applied to documents of Microsoft Word 2010, Microsoft Excel 2010, and Microsoft PowerPoint 2010.

### Step A.1:

Open the MS Word 2010 document named "Confidential Information.doc" under "C:\My Documents\".

	File name:       Image: Comparison of type:         All Word Documents (*.docx; *.docm; *.dotx; *.dotm; *.doc; *.c
Tools	

#### Step A.3:

In the menu bar, click "File" and select "Info", the information about the file is shown.

#### Step A.4:

Click "Protect Document", and select "Encrypt with Password" from the drop down list.

#### Step A.5:

This is one of the most important steps. You have to choose a good password for protecting the file. Type the password in the input field, then click "**OK**".

Encrypt Document
Encrypt the contents of this file Passwo <u>r</u> d:
•••••
Caution: If you lose or forget the password, it cannot be recovered. It is advisable to keep a list of passwords and their corresponding document names in a safe place. (Remember that passwords are case-sensitive.)
OK Cancel

#### Step A.6:

Re-type the password in the input field of Confirm Password window, then click "OK".

#### Step A.7:

The Permissions of this document is changed, a password is required to open this document.

In the left menu, click "Save" to make change effective.

You can close the file and reopen it again to test the password protection setting.

## B. To open a password-protected document

This part will show you how to open a password-protected Microsoft Office 2010 documents. Same steps can be applied to documents of Microsoft Word 2010, Microsoft Excel 2010, and Microsoft PowerPoint 2010.

#### Step B.1:

Open the MS Word 2010, click "File", then select "Open".
